🌐 Portfolio

Skills

- **Languages/Frameworks** – TypeScript, NodeJS, Next.js, Python, FastAPI
- **Frameworks & Libraries** – React, Postgres, Redis, MySQL, GraphQL, Keycloak
- **Tools & DevOps** – Docker, WebSocket, Linux, Git, Microservices, AWS, Nginx

Experience

Wealthfino

Mar 2026 – Present

Software Engineer

- Redesigned the company website to align with SEBI stock broker registration guidelines.
- Built an Expo Go app for real-time website content management for admin.
- Built a role-based CRM using TurboRepo and Next.js, increasing API throughput by 3.6× (12→43 req/s) through performance optimizations validated with k6.
- Implemented employee, leave, issue, announcement, and performance management modules.
- Built lead management and automated salary slip generation features.
- **Tech - Next.js, TurboRepo, React Native (Expo), TanStack Query, Jotai, Microservices, k6**

SpaceAI

Jul 2025 – Nov 2025

Part-time Software Engineer

- Optimized performance for an AI-powered email client with intelligent email processing.
- Designed and integrated Keycloak SSO across three SaaS products, reducing duplicate authentication flows and simplifying user onboarding.
- Diagnosed and resolved production issues, improving platform reliability.
- Built a customizable drag-and-drop dashboard for end users.
- Deployed multiple production applications on AWS using Nginx.
- **Tech - Next.js, NestJS, Keycloak, Nginx, Microservices, AWS, Docker, Redis, Linux, GraphQL**

CodeTikki

Dec 2023 – Jan 2024

Full Stack Engineer Intern

- Collaborated with a team of five developers on UI/UX implementation.
- Developed a React dashboard from Figma designs for managing 150+ employee records.
- Built a WhatsApp reminder plugin that automatically notified users before scheduled events.
- **Tech - MERN Stack, PostgreSQL, Figma**

Projects

Friday – Local Voice Assistant

Jan 2026

Python • LangChain • Ollama • Qwen2 0.5B • faster-whisper • Google Cloud STT • ChromaDB

- Built a local voice assistant with Ollama (Qwen2 0.5B) tool calling, faster-whisper + Google Cloud STT for speech, and Piper TTS — with Wayland/X11 runtime detection for cross-environment input automation.
- Implemented voice-triggered process orchestration with port-conflict detection, resilient DuckDuckGo search fallback, and autonomous goal-directed mode running in a non-blocking daemon thread.

Creator Dashboard

Mar 2026

Next.js • TypeScript • YouTube Data API v3 • Groq

- Built a unified content tool with YouTube metadata enhancement and direct video upload via YouTube Data API v3, Groq-powered tweet generation, and a financial news scraper returning structured BUY/SELL/HOLD recommendations — launchable via Friday voice command.

Spidy UI

Jan 2025

Next.js • TypeScript • Express • Shadcn/UI

- Built a custom component registry using Express.js and REST APIs.
- Created an interactive documentation website with live component previews.
- Designed a modular UI component library extending Shadcn/UI.

Open Source Contributions

Orca (stablyai/orca)

GitHub Contributor

- Implemented a hierarchical tree view for pull request diffs with folder compaction, Flat/Tree toggle, and nested file rendering.

NestJS CLI

Open Source Moderator

- Reviewed and triaged pull requests, closing duplicate, invalid, and spam submissions while maintaining repository quality.

Education

Bachelor of Science (Mathematics, Minor in Computer Science)

2024 – 2027

- Maa Sakuntala P.G. College
- Solved 250+ DSA problems across LeetCode, GeeksforGeeks, and CodeChef
